GYMFOLD

WINNING FEATURES OF GYMFOLD "D":

• Better Sound Control

To increase safety and sound proofing during activities in the gymnasium, **Moderco** offers you a **Gymfold "D"** curtain with double siding $\pm 460\text{mm}$ (18 inches) apart.

• Options

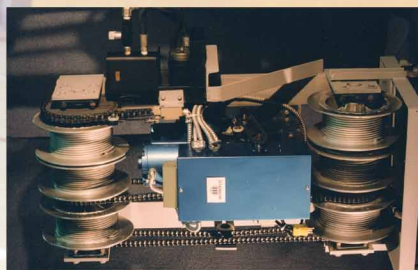

1. **Safety Guide Box** – installed on the wall, they prevent accidents and accentuate the acoustic value of the curtain. They are made of foam and coated with same vinyl as the curtain for nicer appearance.
2. **Valences** – to conceal operation mechanism and increase sound reduction. **Moderco** offers you valences installed on each side of the stacking area.

• Maximum Safety

Moderco motor system has all the necessary features to prevent the curtain from free falling.

- 1) A 100% 5 year warranty on all components.
- 2) Machined grooved drums with wide flange to avoid cable derailment.
- 3) Double chain system equipped with safety switches in case of chain breakage.
- 4) Optional hydraulic emergency stopping device in case of gearbox malfunction.

GYMFOLD "S" (single)

More economical than the double sided **Gymfold "D"** model, the single sided **Gymfold "S"** model is an excellent alternative to separate daily activities.

Moderco's Gymfold "S" offers you the same motor system with the identical safety characteristics as the **Gymfold "D"** model. Material used for the single curtain can vary from 43oz. vinyl to 19oz. vinyl or combination of 19oz. vinyl and net.

GYMFOLD "M" (manual)

Moderco's manually operated curtain can be used with 19oz. vinyl, vinyl/net combination or all kinds of utility netting. (golf, baseball, archery, etc...)

GYMFOLD

Selection table

Operation	Stack	Curtain			
		43oz.	19oz.	Combination 19oz. and Net	Net
Gymfold "D"	Motor	To ceiling	✓		
Gymfold "S"	Motor	To ceiling	✓	✓	✓
